Let me see what I can do on this. Does the county have any ability to seed the site with a native seed?

Well I know you have your hands full right now and probably will for some time, but maybe you could refer me to somebody else who is more free at the moment. I hope you stay safe down there. I called because I just did a final check on Hope Iron & Metal last week to see the completion and take some photographs of it. However, the majority of the grass seed has not done well and almost all of the site is just exposed soil with little to no vegetation. You can tell where some rain events have started some erosion. The only successful areas are the northeast portion of the site where you guys had first seeded while on-site and the residential yards that were remediated. I've attached some of the pictures I took at the site while there to show you.

Thanks for the help,

Joshua Graham

Josh, I am involved in the Hurricane Harvey response. I missed your call. What was the concern again?
